ALL AUSTRALIAN VITREOUS ENAMEL GAS WATER HEATER

# High Efficiency 5 Star Gas Hot Water

## Take a look at the newest member of our team

The brand new AquaMAX 135 MAXI-name!® Gas water heater is turning plenty of heads with its Energy Efficient Mains Pressure hot water delivery. The latest member of the award winning AquaMAX Gas hot water team, the AquaMAX 135 is built to last using the very latest technology and backed by an unprecedented **five year** cylinder warranty<sup>1</sup>

And AquaMAX are made by Aussies for Aussie conditions, right here at home, so, no matter what your needs, you can count on AquaMAX to go the distance.

### LATEST TECHNOLOGY

Built around our trademarked MAXI-name!® cylinder the AquaMAX 135 is a compact size water heater featuring the latest burner technology for maximum efficiency. Using a Stainless Steel burner this heater has no central flue resulting in energy efficiency second to none.

### FIVE STAR EFFICIENCY

The only water heater of its type with a five star energy rating, the AquaMAX 135 gas hot water heater offers water saving advantages whilst using the least amount of gas possible.

As a result, AquaMAX Gas Water Heaters create significantly less greenhouse emissions and save on excess water loss unlike continuous flow water heaters which waste water every time a tap is turned on.

### QUALITY SECOND TO NONE

The envy of all the other manufacturers for the high efficiency and long life of our products, we have created a low maintenance gas water heater that provides current installers and consumers with plenty of confidence for the future with a five year warranty to prove it.

A claim that is now backed by recent independent assessment putting AquaMAX Gas water heaters at the top of the list for quality and reliability.

**SOLARMAX™**

## UPGRADE TO SOLAR ANY TIME YOU WANT

Aquamax's award winning Solarmax systems offer significant financial and environmental savings with boosted capacity that will ensure you never run out of energy efficient hot water.

Our Gas 135 water heater has the capability to be upgraded to a Solarmax system with the simple addition of a storage tank, control box and panels.

So if you are still not sure on going solar or you just want to spread the cost, AquaMAX gives you the freedom to upgrade your system at your pace.

Call 1800 676 000 or visit our website at [aquamax.com.au](http://aquamax.com.au) for more information.

## Hot Water Heater Comparison<sup>3</sup>

**AQUAMAX 135**

**Old Style Storage**

**Continuous Flow**

	AQUAMAX 135	Old Style Storage	Continuous Flow
Time for hot water to reach tap	Quick	Quick	Slow
Less peak period greenhouse gas pollution	Yes	No	No
Australian Designed	Yes	Yes	No
Australian Made/Australian Jobs	Yes	Yes	No
Australian Owned (manufacture)	Yes	Yes	No
Designed for Australian conditions	Yes	Yes	No
Price of Heater Installation	Low	Low	Mod - High
Fast Recovery	Yes	No	Yes
Instant Hot Water	Yes	Yes	No
Full Mains pressure	Yes	Yes	No
Remote Control (via mixing tap)	Yes	Yes	Some
5 Star Energy Rating	Yes	No	Some
Latest Burner Technology	Yes	No	Yes
Latest pilot Technology	Yes	No	Yes
Two Sacrificial Anodes	Yes	No	N/A
Simple & Quick installation	Yes	Yes	No
Uses existing Gas supply pipe	Yes	Yes	No
Needs 240V external power point	No	No	Yes
Hot Water available during power fail	Yes	Yes	No
Water Wastage	Low	Low	High
Noisy Operation	No	No	Yes
Use more than one tap at a time without flow reduction	Yes	Yes	No
Thermal Efficiency	85%	76% (approx)	80% (approx)
Heat loss every time a hot tap is used	Low	Low	High

## THE PERFECT FIT FOR NEW HOMES

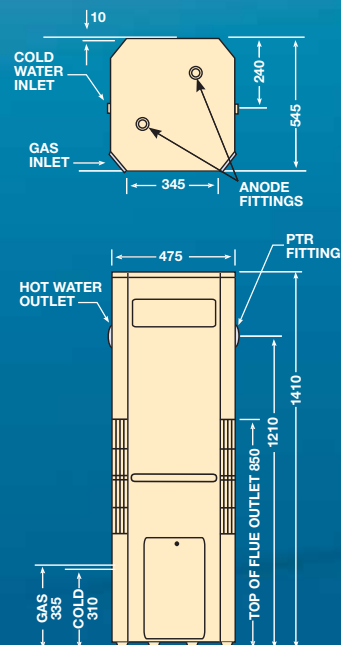

The AquaMAX 135 is specifically designed for installation in new homes where an approved tempering valve must be fitted by regulation. Generating a massive 300 litres of 50°C hot water in the first hour (based on ambient temp. of 15°C raised 35°C) you'll be hard pressed to find better output from a unit this size.

Equally comfortable replacing old units in existing homes, the Aquamax 135 can generate 270 litres of untempered 60°C hot water in the first hour (based on ambient temp. of 15°C raised 45°C).

Designed for easy external installation, the impressive capacity of the AquaMAX 135 is matched by an equally impressive, five year cylinder warranty.<sup>1</sup>

## AQUAMAX 135 SPECIFICATIONS

AQUAMAX 135	
Cat. No.	AQUAMAX 135
Gas type	Natural/LPG
Tank capacity	135 litres
Nominal gas consumption	30 MJ/Hr
AGA Star Rating Index	5 Stars
Recovery rate	135 L/Hr @ 45°C 121 L/Hr @ 50°C
Cold water inlet	Rp 3/4" female
Hot Water outlet	Rp 3/4" female
PTR Valve	Rp 1/2" female
Gas inlet	1/2" flared compression
Max. water supply pressure	1100 kPa
Relief valve setting	1400 kPa@99°C
Warranty	5 years (on cylinder)
WaterMark licence number	W200
Overall height	1410mm
Width (approx.)	475mm
Depth (approx.)	545mm
AGA approval number	6705
Weight empty (approx.)	67kg

Due to constant product improvements, the above specifications are subject to change without notice.
